

Press Release

MELBOURNE, AUSTRALIA, OCTOBER 4, 2021

FIMER LAUNCHES CERTIFIED INSTALLER PROGRAM IN AUSTRALIA AND NEW ZEALAND

Starting in October 2021, FIMER is inviting Australian and New Zealand solar & energy storage installers to register for FIMER’s Installer Program. FIMER’s program aims to provide better support and incentivise and reward FIMER’s loyal installers.

Certified FIMER Installers can access enhanced service and warranty benefits, including an extra two-year warranty (total 12 years) on its UNO-DM-PLUS-Q inverter range, priority call centre support, online support booking requests and more.

The program also offers an integrated online portal that provides access to online training, FIMER marketing collateral with the opportunity for co-branding, lead generation, the ability to earn FIMER Dollars to use toward FIMER merchandise, as well as exclusive promotions, events and much more.

Jason Venning, FIMER Country Manager for Australia and New Zealand, “We are excited to be launching this installer program in Australia and New Zealand. I believe this program provides installers with another reason to use FIMER products. Not only do we provide quality Italian made products, leading warranties, local stock and support – we now offer an industry-leading partner program that adds significant value for the installer and their customers.”

For installers interested in joining this free program, FIMER requires a minimum number of installs registered quarterly and training and branding activities to be completed to achieve and maintain their certified installer status.
