Residential Solar Panel

SunPower Performance Panels wrap front contact cells with 30+ years of SunPower materials and manufacturing expertise. The weakest points of Conventional Panel design are eliminated to deliver superior power, reliability, value and savings.¹

**Engineered for Performance**

- Robust and flexible cell connection technology. Outstanding reliability.
- Conductive adhesive, proven in the aerospace industry.
- Redundant cell to cell connections.
- Reduced panel temperature due to unique electrical bussing.

**High Power**

Enhanced active area and monocrystalline cells increase power and savings while designing out fragile ribbons and solder bonds on the cells.

**High Performance**

Up to 26% more energy in the same space over 25 years.² Outperforms Conventional Panels in partial shade thanks to unique parallel circuitry. Proprietary bussing design limits power loss, maximizing production during morning and evening shading or soiling.

**Premium Aesthetics**

SunPower® Performance Panels with their black frame and black backsheets blend harmoniously into your roof and add elegance to your home.

**High Reliability**

SunPower Performance Panels are the most deployed shingled solar panel in the world.³ Innovative cell shingling mitigates the leading reliability challenges associated with conventional front contact panels by designing out fragile ribbons and solder bonds on the cells. SunPower stands behind its panels with its industry-leading Complete Confidence Warranty. SunPower’s Performance Panels are warranted to produce more than 97.5% power in the first year, then declining by 0.5% per year, ending at 85.5% power after 25 years.

**25 Year Combined Warranty**

# Tests And Certifications (Pending)

- **Standard Tests**: IEC 61215, IEC 61730
- **EHS Compliance**: OHSAS 18001:2007, Recycling Scheme
- **Ammonia Test**: IEC 62716
- **Desert Test**: MIL-STD-810G
- **Salt Spray Test**: IEC 61701 (maximum severity)
- **LeTID Test**: IEC 61215 (MQT 23.1 LeTID detection) draft standard
- **PID Test**: Potential-Induced Degradation free: 1000 V
- **Available Listings**: TUV

# Operating Condition And Mechanical Data

- **Temperature**: −40°C to +85°C
- **Impact Resistance**: 25 mm diameter hail at 23 m/s
- **Solar Cells**: Monocrystalline PERC
- **Tempered Glass**: High-transmission tempered anti-reflective
- **Junction Box**: IP-67, Stäubli (MC4), 3 bypass diodes
- **Weight**: 18.1 kg
- **Max. Load**: Wind: 2400 Pa, 245 kg/m² front & back, Snow: 5400 Pa, 550 kg/m² front
- **Frame**: Class 1 black anodized (highest AAMA rating)

---

1 Independent Shade Study by CFTV Laboratory. 2016.
2 SunPower 335 W, 19.9% efficient, compared to a Conventional Panel on same-sized arrays (280 W p-multi, 17% efficient, approx. 1.64 m²), 3% more energy per watt (based on PVSim runs for avg US climate), 0.25%/yr slower degradation rate (Jordan, et. al. Robust PV Degradation Methodology and Application. PVSC 2018).
4 Measured at Standard Test Conditions (STC): irradiance of 1000 W/m², AM 1.5, and cell temperature 25°C.
5 Class C fire rating per IEC 61730.
6 Fraunhofer CSP LID Sensitivity according to IEC 61215 (MQT 23.1 LeTID detection), <1% power loss.

Designed in USA, assembled in China.
