

Finn Peacock's checklist for comparing EV charger quotes.

EV Charger	Quote 1:	Quote 2:	Quote 3:
Installer Name			
Price			
Install timeframe			
EV Charger model			
Warranty (years)			
Charger location agreed? (out of direct sun)			
Charger cabling route agreed? Surface conduit or in-wall?			
Installer looked in your switchboard to ensure: a) enough room b) You won't trip main breaker at full load			
Local Isolator? Yes/No (not required, but you may prefer one)			
Length of charging cable.			
Will be installed on 32A circuit? (for max charging speed)			
If house is three-phase: three-phase charger?			
Features (if important to you):			
Integrates with your solar?			
Integrates with your battery?			
Charging cable supplied? Note. If you need to BYO cable, 10m cable can cost ~\$400			
OCPD compatible?			
Phone App (test the app to see if it's any good and has got the features you need)			
Multiple Charger Load Management			
Household Loads Demand Management			
Timers			
Secure Access			

Finally: Everything you need to know as a primer – or refresher – when buying an EV charger is covered in my [home EV chargers guide](#).
